Where and When Tailor-made Legal English Course

The Tailor-made Legal English Course

Naturally, the programme and the frequency of the sessions of tailor-made courses will be determined in consultation. In addition, the dates and times at which and the location where the regular tailor-made course takes place are determined in consultation with the client.

Those who are interested in a tailor-made course, are, therefore, advised to contact us by telephone or email. As a general rule, the tailor-made courses are held online but can also be held at the location of the client.

The correspondence version of the Legal English tailor-made course

In case of the correspondence version of the tailor-made course, the participant sends in the assignments by email. In the next week these are returned, provided with comments and suggestions. Any additional questions can also be asked by email. The assignments and the other course materials are sent to the distance student by email.
